How an AI Agent Works

Understand

Understand the Goal and Context

The agent receives a target, as well as information about the current task and relevant context.

Planning

Plan the Procedure

He determines which intermediate steps are necessary and what data or tools he needs to carry them out.

In simple terms, an AI agent operates in a loop consisting of understanding, planning, acting, and evaluating.

Trade

Use Tools and Perform Actions

Über APIs oder andere Schnittstellen kann er beispielsweise Daten abrufen, Dokumente verarbeiten oder Aktionen ausführen.

Check

Review the results and determine the next step

The agent evaluates the result of its action and decides whether the goal has been achieved or whether further steps are necessary.
